

**ABSTRACT****METHOD AND APPARATUS FOR APPLYING INFORMATION  
REMOTELY VIA A MOBILE DEVICE**

5

A method and apparatus for applying information stored remotely to an appliance via a mobile device are provided. The mobile device initiates the process by sending instructions to a computer system via a network. The instructions designate a first piece of information to be processed as well as the 10 appliance to which the information is to be applied. According to the instructions, the computer system retrieves the first piece of information and converts the information to a document suitable for the appliance. The computer system then applies the document to the designated appliance.
